Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination does not fairly suggest the claimed invention for developing and modifying customized software applications and various application interfaces are uniquely modified in response to the usage level and skills of a particular operator. Specifically, claims 1, 16, 19 and 20 are directed to acquiring operator's profile, monitoring the identified operator's use of the software application and automatically modifying the functionality of the software application when the threshold value is exceeded by the skill level. Therefore, the claimed invention improves the application learning process and assist a novice user in completing one or more tasks and reduces the steps required to successfully navigate and operate complex software interfaces. Because help systems are often generated using the names of underlying objects provided by the various software engineers and developers to identify low-level operations, they are often frustrating to new users who are unfamiliar with the names used by the developers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
